

# Keep patients safe this Winter with Care Sourcer

Care Sourcer's easy-to-use care matching service can reduce delayed discharges of adults and older people, increase patient safety and reduce costs.

This innovative service will support your organisation to manage delayed transfers of care in three easy steps:

## 1. You call Care Sourcer's dedicated care matching team

Care Sourcer's experienced care matchers are on hand to take the details of the person needing care.

## 2. Care Sourcer quickly arrange care in the required area

Care Sourcer will liaise with providers who can offer local care at a suitable rate, arrange assessments and keep the patient's family up to date every step of the way.

## 3. Your organisation is notified of the discharge plan for that patient

Once care has been agreed, Care Sourcer will present you with a comprehensive discharge plan.
